Advanced Mold Polishing Class

Take your mold polishing skills to the next level!

Learn advanced mold polishing methods in our new 3-day intensive course tailored to your specific parts! Led by a Master Mold Polishing Instructor with over 40 years' experience, this program promises to bring you invaluable hands-on learning suited to your company's needs.

Donald Gonzalez
MASTER MOLD POLISHER / INSTRUCTOR

Class Overview

The Advanced class is fully tailored to your specific part. Gesswein will provide all the polishing tools and equipment needed to achieve the finish your piece requires. Throughout the class you will gain a deeper level of experience and familiarity with the latest tools, technology, and techniques used by mold polishers.

Requirements

Not For Beginners!

- **Minimum 2-years of experience in mold polishing**
- Provide Gesswein with an illustration or drawing of your part in advance of registration. We will review and develop your agenda prior to confirming your spot in the class.
- Part must be handheld as there will be no hoist available.

Class Date

July 20–22, 2027

Enrollment Fee

$1950
due in full prior to the class

Location

201 Hancock Ave Bridgeport, CT 06605

Agenda

- 3-day intensive training at Gesswein headquarters in Bridgeport, CT.
- PowerPoint presentation on polishing steps and tools.
- Overview of "standard" mold polishing methods used for achieving a mirror finish.
- Polish your own pieces with Instructor guidance
- "Make your Own Tools" Workshop.
- Demonstration of latest polishing and mold repair equipment.

Advanced Class Detailed Agenda

Most of the class time will be spent polishing your work pieces. We recommend bringing various parts such as cavities, cores, round work, and core pins to last for 3 days of polishing. Work pieces with rough surface finishes are ideal.

Class Day 1

- Introductory presentation on advanced mold polishing concepts.
- Hands on training flat surface polishing up to A3, A2, and A1 finishes (workpiece provided by Gesswein).
- Develop customized polishing plans for your work pieces with instructor and begin polishing!

Class Day 2

- Continue polishing your work pieces.
- 'Make your own tools' training. Create customized polishing tools for your work pieces.
- Overview of advanced technology for tool rooms such as laser welders, TIG welders, and electropolishing machines. Hands-on training is optional.

Class Day 3

- Continue polishing your work pieces.
- Polishing core pins training.
- Leave around lunchtime to catch a flight or keep training until 5pm.
